

How Do I Write an Annotated Bibliography?

Howles

What is an Annotated Bibliography?

For this class, you will read research-level, peer reviewed papers. I will require that you submit an annotated bibliography. Simply stated, the annotated bibliography is a summary of the paper(s) you deliver for the assignment.

Where do I find papers? Papers must be peer reviewed. Start with the library's databases (IEEE or ACM are good choices). Be sure you download the .pdf and save it to submit with your annotations.

What is the required format and content?

Any annotated bibliographies not in this format will not be graded.

The summary for each paper must include:

1. A full citation. The citation must be in IEEE format. See the guidelines at www.ieee.org/documents/ieeecitationref.pdf
2. A **summary** of the paper. What is the author saying? What are the main points? When summarizing, do not use **any** passages directly quoted from the original paper. This section must be written completely in your words, and must be the longest of the two sections (summary and reflection).
3. A **reflective** component. This is a personal reflection of what you think of the paper. Did you find it useful? Did it help you to better understand the topic? Do you agree with what the author is saying? This section should not exceed 1 paragraph.

In general, the annotation for *each* paper you review should not exceed 1.5 pages (12 point Times New Roman font, single spaced, with standard 1 inch margins).

If you are assigned multiple papers in the same assignment, you should submit your one-page annotation for each paper as a single document. I prefer .doc or .docx format so I can easily provide feedback. You must also submit a .pdf version of the original paper.

Expect that all assignments will be submitted through a plagiarism detector. ***Do not include any quoted passages from the original paper.*** Obviously, it is **plagiarism** to copy-paste any portion, any amount of the paper into your annotation.
